ISSN 0024-6107

Journal of the London Mathematical Society

Second Series
Volume 72
2005

Edited by Francis E. Burstall
John F. Toland

Executive Editor Amanda Harper

© London Mathematical Society 2005 Cambridge University Press

EDITORIAL ADVISORY BOARD

Algebra and representation theory
Professor S. KOENIG, University of Leicester
Algebraic combinatorics and finite group theory
Professor A. A. IVANOV, Imperial College London
Algebraic geometry
Dr G. K. SANKARAN, University of Bath
Algebraic number theory
Dr A. F. JARVIS, University of Sheffield
Algebraic topology
Dr P. R. TURNER, Heriot-Watt University
Combinatorics and theoretical computer science
Professor C. J. MITCHELL, Royal Holloway, University of London
Complex analysis and potential theory
Dr T. F. CARROLL, University College Cork, National University of Ireland
Differential geometry and geometric analysis
Dr M. A. SINGER, University of Edinburgh
Discrete groups and topology
Professor I. J. LEARY, University of Southampton
Elementary and analytic number theory
Professor G. HARMAN, Royal Holloway, University of London
Ergodic theory and dynamical systems
Professor T. B. WARD, University of East Anglia
Finite groups
Professor R. A. WILSON, Queen Mary, University of London
Functional analysis
Dr M. C. WHITE, University of Newcastle upon Tyne
Functional analysis and operator theory
Professor C. J. K. BATTY, University of Oxford
Geometric partial differential equations
Dr P. M. TOPPING, University of Warwick
Infinite group theory
Professor M. P. F. DU SAUTOY, University of Oxford
Lie theory and representation theory
Professor A. PREMET, University of Manchester
Linear partial differential equations and spectral theory
Professor A. V. SOBOLEV, University of Sussex
Logic, analytic and algebraic geometry, theoretical computer science
Professor A. J. MACINTYRE, Queen Mary, University of London
Low-dimensional topology, geometry and discrete groups
Professor A. W. REID, University of Texas
Mathematical logic
Professor M. PREST, University of Manchester
Mathematical physics
Dr N. M. J. WOODHOUSE, University of Oxford
Non-commutative algebra and quantum groups
Professor K. A. BROWN, University of Glasgow
Non-commutative geometry
Professor A. G. ROBERTSON, University of Newcastle upon Tyne
Non-linear analysis and differential equations
Professor J. R. L. WEBB, University of Glasgow
Non-linear partial differential equations and calculus of variations
Professor S. MÜLLER, Max Planck Institute for Mathematics in the Sciences, Leipzig
Number theory
Professor J. E. CREMONA, University of Nottingham
Ordinary differential equations
Dr C. J. CHRISTOPHER, University of Plymouth
Probability and stochastic analysis
Dr B. M. HAMBLY, University of Oxford
Real analysis and geometric measure theory
Professor M. CSÖRNYEI, University College London
Real analysis, potential theory and approximation theory
Professor S. J. GARDINER, University College Dublin, National University of Ireland
Real harmonic analysis
Dr J. R. WRIGHT, University of Edinburgh
Representation theory and homological algebra
Dr A. D. KING, University of Bath
Singularity theory and geometry
Professor V. V. GORYUNOV, University of Liverpool
Spectral geometry, partial differential equations and related problems in stochastic analysis
Professor M. VAN DEN BERG, University of Bristol
Topology and K-theory
Professor U. L. TILLMANN, University of Oxford

CONTENTS

AMARZAYA, A. and GUEST, M. A., Gromov–Witten invariants of flag manifolds, via D-modules .. 121
ANDERSSON, E., A uniqueness theorem in the inverse spectral theory of a certain higher-order ordinary differential equation using Paley–Wiener methods .. 169

BAILEY, R. A. and CAMERON, PETER J., Crested products of association schemes .. 1
BERTOIN, JEAN and ROUAULT, ALAIN, Discretization methods for homogeneous fragmentations .. 91
BOCA, FLORIN P. and ZAHARESCU, ALEXANDRU, The correlations of Farey fractions .. 25
BRESSAUD, XAVIER, DURAND, FABIEN and MAASS, ALEJANDRO, Necessary and sufficient conditions to be an eigenvalue for linearly recurrent dynamical Cantor systems .. 799
BUFF, XAVIER, FAGELLA, NÚRIA, GEYER, LUKAS and HENRIKSEN, CHRISTIAN, Herman rings and Arnold disks .. 689

CABELLO SÁNCHEZ, FÉLIX, CASTILLO, JESÚS M. F. and PAPINI, PIER L., Seven views on approximate convexity and the geometry of K-spaces .. 457
CAMERON, PETER J., *see* Bailey, R. A.
CASTILLO, JESÚS M. F., *see* Cabello Sánchez, Félix
CHAN, DANIEL and KULKARNI, RAJESH S., Numerically Calabi–Yau orders on surfaces .. 571
CLIFF, GERALD and STOKKE, ANNA, Codeterminants for the symplectic Schur algebra .. 585
COSSIDENTE, ANTONIO and PENTTILA, TIM, Hemisystems on the Hermitian surface .. 731

D'ALMEIDA, JEAN, GRUSON, LAURENT and PERRIN, NICOLAS, Courbes de genre 5 munies d'une involution sans point fixe .. 545
DEMANGE, BRUNO, Uncertainty principles for the ambiguity function .. 717
DONG, WEI, A priori estimates and existence of positive solutions for a quasilinear elliptic equation .. 645
DRMOTA, MICHAEL and RIVAT, JOËL, The sum-of-digits function of squares .. 273
DUNCAN, BENTON L., Explicit construction and uniqueness for universal operator algebras of directed graphs .. 763
DURAND, FABIEN, *see* Bressaud, Xavier
